The boat has been refloished and refurcished on an elaborate ecale, and an additional tier of twenty-six staterooms and a gallery have been constructed and fixted up, making the total number 107, eight of which are as large as hotel apartments, arranged in suites of two, communicating through folding doors, and equipped with glistening brase bedsteads, which makes the steamer, together with the Norfolk (which has undergone a similar me amorphosis) the dergone a similar me smorphosis) the largest and handsomest of those plying the Potomac and Chesapeake. An in-novation in shipbuilding is found in the novation in shipbuilding is found in the new staterooms, where running water is in every basin, together with the latest fmproved sanitary drainage. The main saloon is now fitted up with furniture upholstered in leather. The extensive promenade deck has been in no wise interfered with. Four large new Scotch boilers have been put in, each having a pressure of 170 pounds. The engines have been thoroughly overhauled, and the steamer will average easily twenty statute miles per hour, which is quite a considerable in-crease of speed. An entirely new elec-tric light plant has also been installed. The improvements were made under the personal supervision of Mr. John Callahan, the general manager of the company. The Washington will hereafter alternate in the daily trips with the Norfolk, the Newport News baving been taken off the line and will shortly be sent to Biltimore, where she will also undergo improvements along the same lines as have been made to the other two vessels.
